• The Day News Global - News & Media Platform (Individual) DEC '25 - PRESENT

React | Vite | Tailwind CSS | Node.js | Express | MongoDB | JWT | bcrypt | Cloudinary

Built a MERN-based news platform with a responsive UI and optimized performance using lazy loading and indexed database queries. Integrated an AI chatbot powered by Groq Llama 3, secure authentication using JWT and bcrypt, and a media management system via Cloudinary. Included admin content management and scalable backend architecture.

• Bookfair Stalls Reservation System (Group) FEB '26 - MAR '26

Spring Boot | React | Java 17 | MySQL | Spring Security (JWT) | Material-UI | QR Code (ZXing) | Vite

Developed a comprehensive Bookfair Reservation System to streamline stall bookings, ticketing, and event management. As a Full-Stack Developer, architected scalable backend endpoints and designed a responsive, interactive frontend interface. Engineered secure user authentication using JWT and implemented automated email notifications integrated with dynamic QR code generation (ZXing) for digital passes, ensuring a seamless and efficient booking experience.
